1.Organisation overview

- **The organisations name is NDLOVU POULTRY FARM.**
- The **history of the business** started at the back yard of Mr Ndlovu in the rural / township area of Mpumalanga where chicken meat was very expensive in supermarket for small portions. He sold live chickens from R65 back then. AS time went by Mrs Ndlovu came up with an innovative idea of preparing the chickens by selling them slaughtered, cleaned intestines and well packaged for the customers. They came up with different prices for the services for example they would charge money for slaughtering the livestock and cleaning for you
- **The mission of this business** is to continue to grow for generation to generation. The mission of this business is to create generational wealth for the Ndlovu legacy. The **vision statement** is that Ndlovu Poultry Farm may be able to work with big supermarkets like Woolworths, Pick n Pay and Checkers.
- **The target audience** of the organisation are local shisanyamas, households, local catering companies.

2.Websites goals and objectives

- The goal of the Ndlovu Poultry farm website is to promote the business, display its poultry products and prices. The website should be able to provide contact and location details. It should make it easier for the customers to learn about and purchase from the farm. Mostly the website should tell visitors what is offers.
- The success of the Ndlovu Poultry Farm website will be measured using the key performance indicators, including the number of people who enquires received through the contact page, the number of products page views and the number of increased customer orders. With this information the business will be able to determine whether the website is effectively promoting the business and attracting more customers.

3. Current Website Analysis

The strengths of Ndlovu Poultry farm:

- More people in that area will be able to know different services and products that are sold
- Those who stay far may be able to order in time and get their delivers, so distance won't be a barrier.

The weakness of Ndlovu Poultry Farm:

- Since it's underdeveloped area many people may find it to be difficult to read the website.
- The business may also find it challenging as they may experience network issues due to its location.

Areas for improvement based on the weaknesses identified:

- To make it more understandable for those who cannot there will be compressed images on how it works

- The website will be designed to load quickly on slow internet connections by optimized images and a simple layout. Customers will be provided with alternative contacts such as contact number and WhatsApp.

4. Proposed Website features and functionality

- Home page: In the home page Ndlovu poultry farm will be introduced and welcomes the customer.
- About us: In this section information will be provided about the farm and its history and its workers and all.
- Products page: In this section displays chickens, eggs, chicks, and their prices.
- Images: Shows the photo of the farm and its products provided.
- Contact page: Allows customers to view the phone number, email, address, or send an enquiry.
- Navigation menu: this feature should help users move easily between pages
- Responsive design: Ensures the website works well on both phones and computers.

5. Designer and user Experience

1. Colour Scheme (Proposed Colour Palette)

- Green: which will represent farming, nature and freshness.
- Brown: Represents the soil and rural environment.
- White: Makes the website look clean and easy to read.
- Yellow/Gold: Represents eggs, warmth, and friendliness.

2. Typography (font Choices and hierarchy)

- Headings: Poppins Bold or Arial Bold (large and easy to notice).
- Body text: Arial or Open Sans (easy to read)
- Important information such as prices and contacts should be in bold.

3. Layout and Design (Overall Design Approach)

- The website will have a clean and simple layout.
- The navigation menu will appear at the top of every page.
- Large images will appear at the top of every page.
- Poultry products will be displayed on the Home and products pages.
- The contact page will contain the business details and a contact form.

4. User experience considerations

- Users will easily navigate the menu
- The website will be Mobile friendly design
- Fast loading pages

- Clear headings
- Readable colours
- Easy to find contact information and prices

5. Low fidelity wireframes
